
CONTENTS

1. Regulation of internal environment

Introduction

The kidneys

How kidneys perform in different habitats and different weather conditions

Diseases of the kidney and their effects

Ways of remedying kidney diseases

The liver

Functions of the liver

Diseases of the liver and their effects

Remedies to liver diseases/control of liver diseases

The skin

Functions of the mammalian skin

Care of mammalian skin

Hormones

Types of hormones and where they are secreted

Effects of oversecretion and deficiency of different hormones

Plant hormones

Modern application of auxins

Other growth promoting substances in plants

Suggested practicals

Summary

Revision Questions

2. Nervous co-ordination

Structure and function of a neurone

Classification of neurones

The central nervous system

Components and functions of the brain

Structure of the spinal cord

The functions of the central nervous system

Peripheral nervous system

Transmission of nervous impulses

Reflex action

Voluntary action

Conditioned reflex

Suggested practicals

Summary
Revision Questions

3. Sense organs

The skin as a sense organ
Organ of smell
Organ of taste
Organ of sight
How the mammalian eye functions
Eye defects
Organ of hearing
Organs of balance
Care of the mammalian ear
Suggested practicals
Summary
Revision Questions

4. Reproduction and Reproductive systems

Introduction
Reproductive system in animals
Reproductive systems in fishes
Reproductive systems in reptiles
Reproductive systems in birds
The mammalian reproductive system
Structure of the mammalian gametes
Similarities in mammalian reproductive systems
Comparison of reproduction in vertebrates
Reproduction in plants
Reproductive systems of flowering plants
Arrangement of floral parts
Kinds of placentation
Suggested practicals
Summary
Revision Questions

5. Reproductive behaviours

Introduction
Courtship
Courtship behaviours in animals
Pollination in plants
Types of pollination
Agents of pollination
Features of cross-pollinated flowers
Advantages and disadvantages of self pollination
Features of wind-pollinated flowers
Features of insect-pollinated flowers

Pollination in an insect-pollinated flower

Suggested practicals

Summary

Revision Questions

6. Development of new organisms

Stages in the development of toad

Metamorphosis in insects

Life history of cockroach

Life cycle of housefly

Adaptive features in a developing animal

Process of development of zygote in flowering plants

Germination of seeds

Types of germination

Process of germination

Conditions necessary for germination

Suggested practicals

Summary

Revision Questions

7. Fruits

Characteristics of fruits and seeds

Structure of fruits

Classification of fruits

Dispersal of fruits and seeds

Modes of dispersal

Suggested practicals

Summary

Revision Questions

8. Variations in populations

Introduction

Morphological variations

Physiological variations

Application of variations

Suggested practicals

Summary

Revision Questions

9. Adaptations for survival

Competition

Factors that bring about competition

Types of competition

Relationship between competition and succession

Structural adaptations

Feeding adaptation of birds and insects

Structural adaptation for protection and defence
Structural adaptation for securing mates
Structural adaptations for regulating body temperature
Convergent adaptation
Adaptive colourations
Behavioural adaptation
Co-operative behaviours among aggregations
Other adaptive behaviours
Social animals
Theories of evolution
Modern theories of evolution
Evidence of evolution
Suggested practicals
Summary
Revision Questions

10. Biology of heredity (genetics)

Introduction
Transmission and expression of characters in organisms
Mendelâ€™s work in genetics
Some basic genetic terms
Mendelian traits
Mendelian laws
Chromosome (the basis of heredity)
DNA
The process of transmission of hereditary characters from parents to offspring
Mitosis and meiosis
Mutations
Probability in genetics
Sex determination in humans
Application of the principles of heredity
Suggested practicals
Summary
Revision Questions

11. Answers to objective questions

12. Glossary
