

# Contents

## 1. The Electronic Structure of Atoms

- 1.1 Investigations into the Structure of the Atom
- 1.2 Arrangement of Electrons in Atoms
- 1.3 Atomic Spectra and Electronic Arrangements in Atoms
- 1.4 Quantum Numbers
- 1.5 Electronic Configurations of the First 30 Elements
- 1.6 Periodicity of Properties

*Chapter Summary*

*Assessment*

## 2. Chemical Bonding

- 2.1 Ionic Bonding
- 2.2 Covalent Bonding
- 2.3 Polar Bonds
- 2.4 Intramolecular Forces
- 2.5 Structures of Simple Solids
- 2.6 Shapes of Some Simple Molecules

*Chapter Summary*

*Assessment*

## 3. Nuclear Chemistry

- 3.1 Radioactivity
- 3.2 Detection of Radiation
- 3.3 Nuclear Reactions
- 3.4 Applications of Radioactivity

*Chapter Summary*

*Assessment*

## 4. Non—Transition Metals

- 4.1 Introduction
- 4.2 Physical ‘Properties of Metals
- 4.3 Chemical Properties of Metals
- 4.4 Occurrence of Metals
- 4.5 Principles of Extraction of Metals

- 4.6 General Properties of Alkali Metals
- 4.7 Sodium and its Compounds
- 4.8 General Properties of Alkaline Earth Metals
- 4.9 Calcium
- 4.10 Magnesium
- 4.11 Aluminium
- 4.12 Tin

*Chapter Summary*

*Assessment*

## **5. Metals of the First Transition Series**

- 5.1 General Properties
- 5.2 Compounds of Transition Metals
- 5.3 Copper
- 5.4 Iron
- 5.5 Alloys
- 5.6 Summary of Chemistry of Metals

*Assessment*

## **6. Alkanoic Acids and Derivatives; Giant Molecules**

- 6.1 Introduction
- 6.2 Alkanoic Acids
- 6.3 Esters
- 6.4 Fats and Oils
- 6.5 Amides
- 6.6 Amino Acids
- 6.7 Giant Molecules and Polymerization
- 6.8 Plastics
- 6.9 Polyamides
- 6.10 Basic Classes of Giant Molecules in Living Things

*Chapter Summary*

*Assessment*

## **7. Projects**

- 7.1 Literature ProjectI : Biographies of Eminent Chemists
- 7.2 Literature Project II : Metals
- 7.3 Experimental Project: Analysis of Rock Samples and Samples of Ores
